# Killer Whales

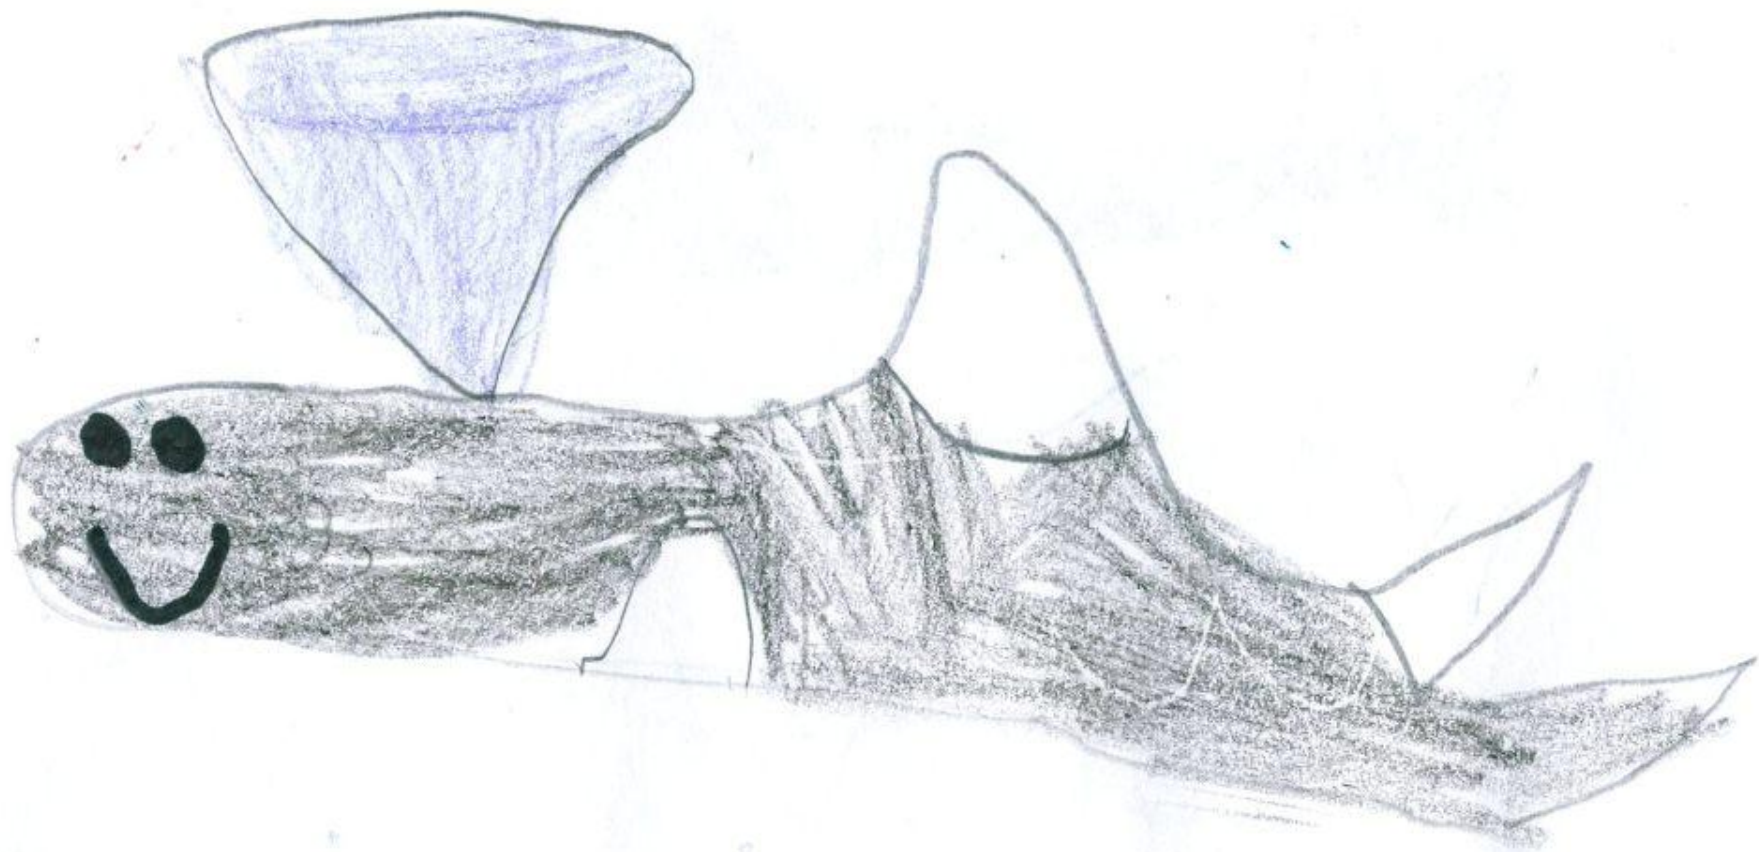

By Sydney

Killer whales are fast and beautiful animals. They look like big, long fish.

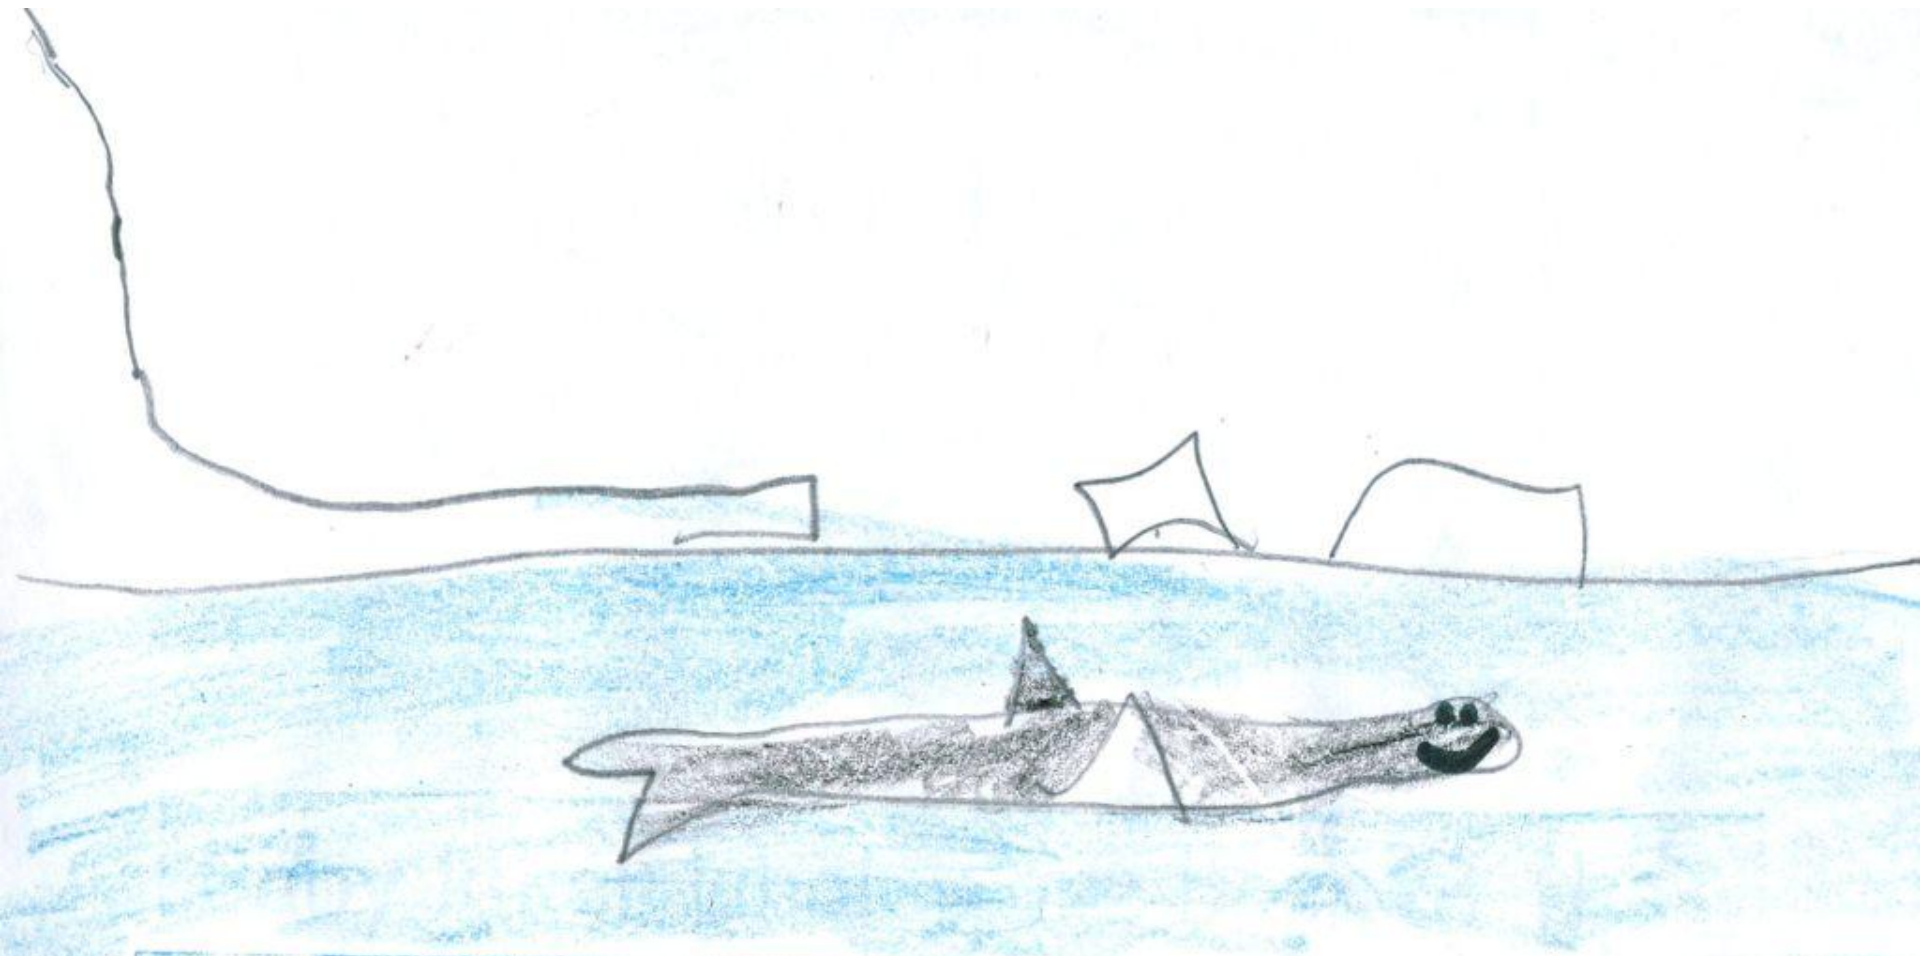

Killer whales are mammals.

They are heavier than an elephant and fast as a shark.

Killer whales are hunters.

They eat dolphins but do not eat people.

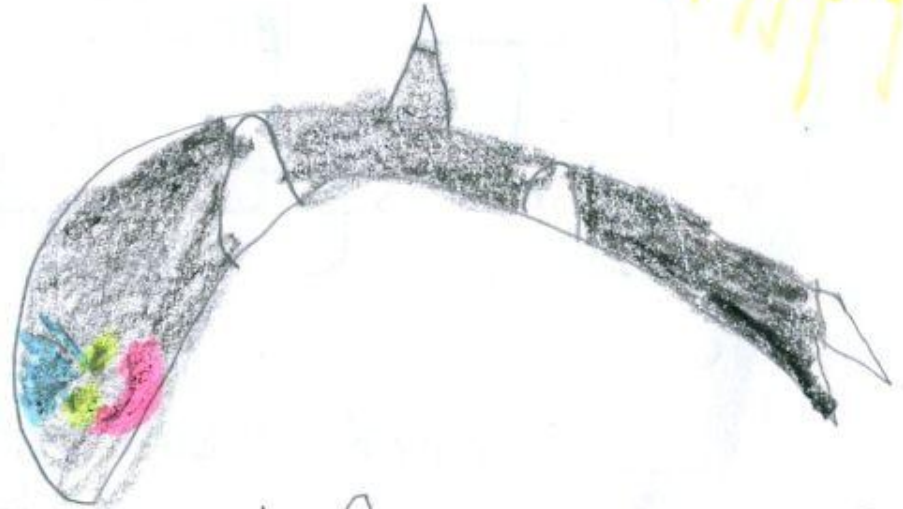

Killer whales are found in oceans  
around the North and South Poles.

42

Baby killer whales are born at the surface of the water and are eight feet long.

I would love to see a killer whale!
