# Wolves

By Alyssa

Wolves are cool animals.

Wolves live in the mountains.  
They live in dens.

Wolves dig in the ground to make a place to lie down.

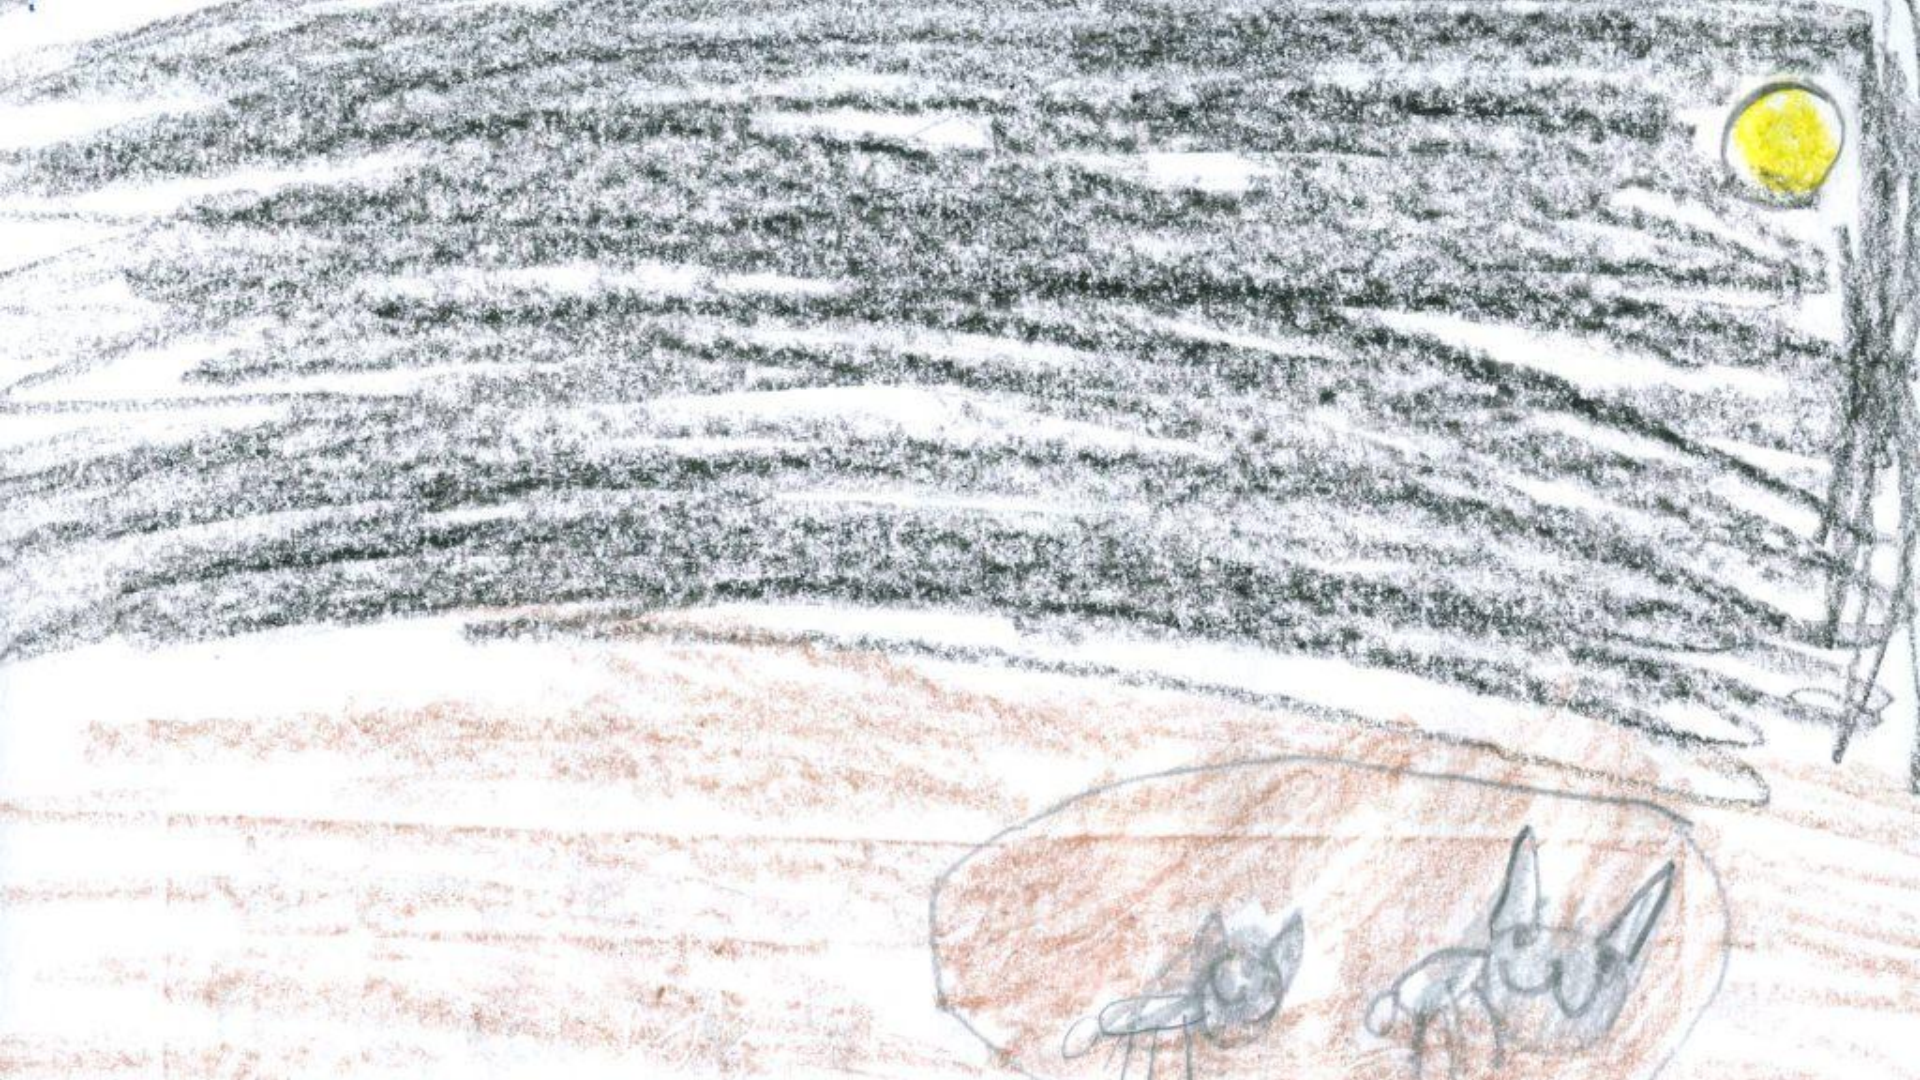

In the daytime, wolves sleep but at night they hunt. They eat meat.

Wolves hunt for food in a pack.

Baby wolves are called pups.

Baby wolves play a game called fight. They practice so they learn to fight their enemies.

Wolves are cool because they howl at the moon. I can howl like a wolf, too.
