# Big Whales' Journey

## Preface

In modern day Canada around 800 A.D. Big Whale is an 11 year old Inuit. In this story Big Whale, Small Ice, and Mega Storm. Small Ice is his brother and Mega Storm was his father. He and his family go on a journey that they will remember as long as they live.

## The Story Begins

Big Whale just woke up. He woke his brother Small Ice and started to breakfast. He met his father, Mega Storm. When he got to breakfast everybody was crazy. His dad asked a shaken lady what was going on. She said the food was eaten by Polar Bears. They could see large bites and pieces of food. Even humongous footprints could be found. Even Mega Storm was scared of Polar Bears. Mega Storm said he would go hunting for food and would take Big Whale and Small Ice with him.

Mega Storm took his sons to the dogsleds. They picked one and stuffed it full of half the food left and supplies. They got some dogs and harpoons. Big Whale said goodbye to his friends and family. They got ready and left the village for the barren ice field.

About two days later Big Whale spotted a large boulder. He told his brother and father. When they got to it they looked carefully at it and found a mark that meant they were about halfway there.

They rode a little more than an hour and saw something. They could see a little hole in the ice! Mega Storm tried to stop the dogs but could not yell quickly enough! The dogs got over safe but the sled did not. The hole broke the sled! Mega Storm and Big Whale jumped out and pulled the sled out. Wait, where's Small Ice?

They dashed to the hole in the ice and found Small Ice! Mega Storm pulled Small Ice out. Mega Storm told Small Ice to tear off his clothes and put on a spare. Mega Storm gave Small Ice a fur pelt

and told him to keep heat. Mega Storm made a fire. The next day they got ready to do something with the sled. The sled was mangled but it could be repaired in time. Mega Storm said they either needed to fix it or make a new one.

They decided to fix it. Mega Storm gathered some extra supplies and got to work. Mega Storm brought some tools mostly used from animals. Mega Storm was one of the best at fixing broken stuff. He chiseled, cut, and wrapped parts of the used sled. Big Whale and Small Ice didn't know much about fixing but after a while they did. Mega Storm finally finished and told his boys to get on.

In three days the family got to the hunting grounds. There were a lot of walrus and seals. They got the harpoons and got firing. They hunted at least 15 walrus and seals and started back to the village. Big Whale and Small Ice were praised for the hunt.

The End
